
Request: Time Capsule, and mixed networks

Posted by thelostpatrol - 2008/02/14 11:41

I would like to see a show where you show off the Time Capsule (both as a Time Machine backup and network storage solution) and show us how it works within a mixed PC/Mac network context.

I'm looking into this device but I'm not quite clear on it yet, and there are no Geniuses around here to tell me anything.
