Have you played Minesweeper on Windows? It is not just for Windows anymore!  
I poked around the Internet for a decent Minesweeper version for Mac OS X and really found one that was to my liking.  
<http://www.mac-dvd-ripper.com/images/free-mac-game/MineSwept.jpg>

And you are sure to find the game called Magic Pen below rather creative(make clever use of your physics):

If you have interest in them, you can go to <http://www.mac-dvd-ripper.com/article/free-mac-game.html> to download them for free.

Minesweeper never gets dull, especially with the scary "8" block waiting for you around every corner.

So... will there be a point in time where this guy's account will get nuked for just spamming on every post?

It seems to be just an adbot.

LOL

They must have a hack for specific captcha modules, in this case, with Joomla, and then unleash little scripts to create their accounts and dump their spam. Or, they have a sweatshop in China with an army of kids firing away for 27 hours a day on 486s, pwning a new captcha every 2 seconds.

At least it's not a deposed Nigerian prince (yet).
