## Watching On Website

Posted by Jamie - 2008/09/21 09:54

---

Hi

I would like to know how big the file sizes are for watching online as I have a 1GB Download limit and this includes streaming video. I cannot download your shows in iTunes as the files are too big but if the file sizes for watching online are not too big then I can still watch your show.

Dude 1GB sucks, video is big period, there is nothing I can do about that. Our video is as small as it gets for the flash.

Ok, I will just have to wait until I go back to the UK in december, I have a 8mbps connection and unlimited download limit there from Tiscali or I can find somewhere if I go away for a weekend between now and december that gives me a free internet connection (normally in a hotel somewhere, dubai). Could you tell me how big the flash files are?
